Assignment –2

Introducing Relational Databases.

1) Which field of the Customers table is the primary key?
Ans: The primary key of the Customers table is Cnum (Customer Number), as it uniquely identifies each customer in the table.

2) What is the 4th column of the Customers table?
Ans: The 4th column of the Customers table is rating.

3) What is another word for row? For column?
Ans: Another word for row is tuple or record.
Another word for column is attribute or field.

4) Why isn't it possible to see the first five rows of a table?

Ans: This is referring to how data is retrieved or displayed by a database system. A specified number of rows may not be automatically displayed by the database if no special instruction is given (such as LIMIT in SQL). Depending on how the database interface is configured to provide results, it could be based on the user's query.
